Survey on Information and Communication Technologies Usage in Households and by Individuals  
2011

---

**98% of portuguese households with internet access have broadband connection**

In 2011, 64% of households have access to a computer at home and 58% have Internet connection; 98% of these (57% of the total of households) have a broadband connection. In the same period, 58% of individuals aged between 16 to 74 years use a computer, 55% access the Internet and 10% have ordered goods or services over the Internet in the three months preceding the survey.
