

Consumer Prices Index

November 2013

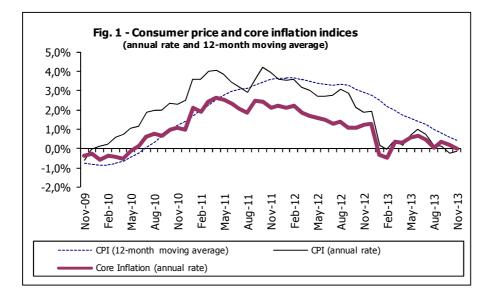

The CPI 12-month average rate was 0.4% in November

The CPI 12-month average rate of change decreased from 0.6% in October to 0.4% in November. The core inflation index, which excludes unprocessed food and energy, decreased 0.1 percentage points (p.p.) to 0.3%.

The HICP 12-month average rate decreased from 0.8% in October to 0.6% in November. In October 2013 the Portuguese HICP 12-month average rate was 0.8 p.p. lower than the rate observed for the Euro-area. Accordingly with Eurostat's flash estimate for the whole area¹, this difference increased to 0.9 p.p. in November.

The 12-month average rate of change of the Portuguese Consumer Price Index (CPI) decreased to 0.4% in November 2013 (0.6% in October). The 12-month core inflation rate, which excludes unprocessed food and energy, moved from 0.4% to 0.3% in November. The main reduction was recorded in COICOP division 7 (Transport) while the main increase was recorded in COICOP division 6 (Health).

In November 2013, the annual inflation rate measured by the CPI remained at -0.2%.

The largest downward pressure on the overall annual rate of change came from changes in prices of COICOP division 7 (Transports). On the opposite side, the largest upward pressure came from changes in the prices of COICOP division 6 (Health).

1/6

¹ Estimate for the annual rate of change of the Euro area HICP, published 29th November 2013. Consumer Price Index – November 2013

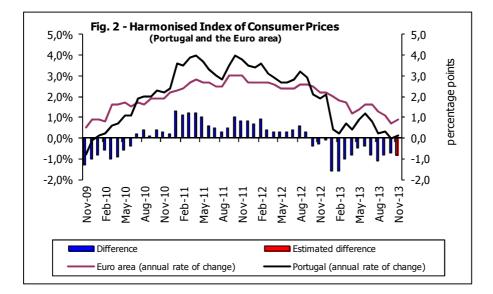

The annual core inflation rate, measured by the CPI excluding energy and unprocessed food, was 0.0% in November (0.2% in October). The CPI monthly rate was -0.2% (0.0% in October 2013 and -0.3% in November 2012). The largest downward pressure came from changes in prices of COICOP division 7 (Transport). The main upward pressure came from changes in COICOP division 8 (Communications).

In November 2013, the HICP 12-month average rate decreased to 0.6% (0.8% in October 2013).

In October 2013 the Portuguese HICP 12-month average rate was 0.8 p.p. lower than the rate observed for the Euroarea. Accordingly with Eurostat's flash estimate for the whole area², this difference increased to 0.9 p.p. in November.

The HICP annual rate of change was 0.1% (0.0% in October 2013). The HICP monthly rate of change was -0.3% (-0.1% and -0.4% respectively in the previous month and in November 2012). In October 2013 the annual rate of change of the Euro area was 0.7 p.p. higher than the annual rate of change of the Portuguese HICP. That difference is estimated to have increased to 0.8 p.p. in November 2013.

Housing Rents

In November 2013, compared with October 2013, the average value of rents by net area for the whole country increased 0.2% (change rate of -0.1% in the previous month).

The main increase was observed in the Lisboa region, where the value of rents by net area increased 0.4%. The most relevant decrease was recorded in the Madeira region (-0.2%).

² Estimate for the annual rate of change of the Euro area HICP, published 29th November 2013. Consumer Price Index – November 2013

Consumer Price Index

The Consumer Price Index (CPI) measures the change over time of the prices of a certain basket of goods and services bought by a "typical" consumer. The CPI has been designed to capture price changes and not to measure price levels. The CPI 2012=100 weighting structure and the sample of goods and services included in the basket are a result of the combination of three fundamental sources of information recently made available: the 2011 Census, the Household Expenditure Survey 2010/2011 and the final 2010 and preliminary 2011 results of the Portuguese National Accounts. Administrative data at a more detailed level is also used.

From 2013 onwards the CPI will be updated every year in a more effective way with the most recent information on prices and quantities.

The CPI is compiled through the aggregation of seven regional price indexes and the goods and services included in the index are grouped according to the COICOP classification.

Table 1: CPI - COICOP¹ Divisions

01	Food and non-alcoholic beverages	07	Transports
02	Alcoholic beverages and tobacco	08	Communications
03	Clothing and footwear	09	Recreation and culture
04	Housing, water, electricity, gas and other fuels	10	Education
05	Furnishings, household equipment and routine maintenance of the house	11	Restaurants and hotels
06	Health	12	Miscellaneous goods and services

¹COICOP: Classification Of Individual Consumption by Purpose

Monthly rate

The monthly rate is the change in the index of a certain month compared with the index of the previous month expressed as a percentage. Although up-to-date, this measure can be affected by seasonal and other effects.

Annual rate

The annual rate is the change in the index of a certain month compared with the index of the same month in the previous year expressed as a percentage. In the presence of a stable seasonal pattern, seasonal effects do not influence this measure.

12-month average rate

The 12-month average rate is the change in the average index of one year compared with the average index of the previous year expressed as a percentage. This moving average is less sensitive to transient changes in prices.

Core inflation index (all items CPI excluding unprocessed food and energy products)

The core inflation index is compiled by excluding the prices of unprocessed food and energy products from the all items CPI. The primary objective of this index is to capture the underlying inflation pressures in the economy.

Harmonised Index of Consumer Prices

The Harmonised Index of Consumer Prices (HICP) is compiled in each member state of the European Union for the purposes of inflation comparisons across EU countries, as required by the Treaty on European Union¹. This index plays an important role as a guideline for the achievement of the European System of Central Banks primary objective: price stability. In 1998, the European Central Bank adopted the HICP as "the most appropriate price measure" for its definition of price stability in the Euro area².

The current HICP (2005 = 100) is produced in each Member State following a harmonized methodology developed by experts in the field of price statistics, under the Eurostat's "Price Statistics Working Group". From the methodological point of view, there are no major differences between the HICP and CPI. However, the different scope of coverage leads to differences in the weighting structure, mainly in Restaurants and hotels. This is mostly an effect of the inclusion of non-residents expenditure ("tourists") in the HICP and the corresponding exclusion from the CPI.

Additional information on the methodology of the HICP can be found on the Eurostat website at http://epp.eurostat.ec.europa.eu/portal/page/portal/hicp/introduction.

Presentation of data and rounding rules

With the release of the January 2013 CPI indices are published with base 100 in the year 2012. Due to rounding procedures, those indices may not reproduce exactly the published rates of change. However, one should bear in mind that the published rates keep unchanged.

In this press release the descriptive analysis is based on values rounded to one decimal.

Next press release

The December 2013 CPI/HICP will be released on January 13th 2014
