International Trade Statistics August 2016

Exports and imports increased by 6.1% and by 10.6% respectively, in nominal terms

In **August 2016**, exports of goods increased by 6.1% and imports of goods grew by 10.6% vis-à-vis August 2015 (-4.6% and -7.3% respectively, in July 2016). Excluding *Fuels and lubricants*, exports grew by 8.3% and imports increased by 14.2% (-3.0% and -3.2% respectively, in July 2016).

Trade balance deficit reached EUR 1 160 million in **August 2016**, increasing by EUR 248 million when compared with August 2015. Trade balance deficit, excluding *Fuels and lubricants*, stood at EUR 805 million, corresponding to an increase of EUR 256 million vis-à-vis August 2015.

In the **quarter ended in August 2016**, exports of goods decreased by 0.8% and imports of goods increased by 0.1%, when compared with the quarter ended in August 2015.

GLOBAL RESULTS

In August 2016, with regard to year-on-year change rates, exports increased by 6.1% (-4.6% in July 2016), as a result of the 12.2% increase recorded in Intra-EU trade (+0.9% in July 2016), given that Extra-EU exports decreased by 7.2% (-18.6% in July 2016). Imports increased by 10.6% (-7.3% in July 2016), mostly due to the 9.5% increase in imports from Intra-EU countries (-3.8% in July 2016). The significant acceleration observed both in exports and imports, might partly reflect a calendar effect (two less working days in July and one more working day in August, when compared with the same months of the previous year).

In August 2016, **excluding** *Fuels and lubricants*, exports increased by 8.3% and imports grew by 14.2% vis-à-vis August 2015 (-3.0% and -3.2% respectively, in July 2016). It should be noted that, since mid-2015, exports and imports, when excluding *Fuels and lubricants*, have been recording growth rates above the total of exports and imports. This outcome largely reflects the impact of the price reduction in *Fuels and lubricants*.

In August 2016, vis-à-vis July 2016, exports decreased by 21.6%, mainly as a result of the reduction in Intra-EU exports, and imports decreased by 7.1%, as a result of the evolution of Intra-EU trade.

In the quarter ended in August 2016, exports decreased by 0.8% while imports grew by 0.1% vis-à-vis the quarter ended in August 2015 (-2.3% and -3.9% respectively, in the quarter ended in July 2016).

BROAD ECONOMIC CATEGORIES

In **August 2016**, when compared to August 2015, with regard to **exports** the largest increases were recorded in *Consumer goods* (corresponding to a 15.6% growth rate) and *Food and beverages* (+18.4%), while exports of *Fuels and lubricants* declined by 16.0%.

When compared to August 2015, as far as **imports** are concerned, the 47.5% increase recorded in *Transport* equipment and accessories clearly stands out, more so in *Other transport* equipment, namely airplanes from Brazil. All categories recorded increases except imports of *Fuels and lubricants* (-8.6%).

COUNTRIES

Among the main destination countries in 2015, the Intra-EU countries were the main contributors to the overall increase in **exports in August 2016**. Exports to Spain attained a year-on-year change rate of +12.6%, France +19.0% and Germany +14.4%. As in the previous month, exports to the United States and Angola declined (-25.8% and -30.6%, respectively), but grew by 41.0% to China (-29.7% in July 2016).

With regard to **imports**, as far as the main partner countries in 2015 are concerned, Germany, Angola and Spain were the main contributors to the overall increase recorded **in August 2016**. It should be noted that imports from Angola rose sharply in August 2016 after having recorded significant reductions in previous months, mostly due to *Fuels and lubricants*.

ABBREVIATIONS

- EU European Union
- CN Combined Nomenclature, 2014, 2015 and 2016 versions
- BEC Classification by Broad Economic Categories, third revision

EXPLANATORY NOTES

- 1. International Trade compiles the statistical information about the commercial trade of goods with the European Union (Intra-EU trade) and Third Countries (Extra-EU trade). In terms of Intra-EU trade statistics it includes adjustments for non-responses as well as for enterprises with transactions below the defined exemption thresholds (which exempts from providing statistical data a significant number of enterprises).
- **2.** For simplification purposes, the terms associated to International Trade Statistics are narrowed to "imports" and "exports", however stating which market is being referred to (Intra-EU, Extra-EU and International Trade which includes the former two).
- **3.** In this "Press Release" the following statistical data are used:
 - 2014: Intra-EU trade January to December definitive results;
 - Extra-EU trade January to December definitive results.
 - 2015: Intra-EU trade January to December provisional results;
 - Extra-EU trade January to December provisional results.
 - 2016: Intra-EU trade January to August monthly preliminary results;
 - Extra-EU trade January to August monthly preliminary results.
- **4.** To ensure the comparability of statistical series, the Euro Zone includes the 19 member states belonging to the Euro Zone in 2016, namely: Germany, Austria, Belgium, Spain, Finland, France, Ireland, Italy, Luxembourg, the Netherlands, Portugal, Greece, Slovenia, Cyprus, Malta, Slovakia, Estonia, Latvia and Lithuania.
- **5.** Due to rounding of numbers, totals might not correspond to the sum of the indicated parcels.
- **6.** Month-to-month growth rate it compares the level of each variable between two consecutive months. Although being an indicator that allows an up to date follow-up of the evolution of each variable, the value of this variation rate is particularly influenced by seasonal fluctuations effects and from other specific effects in one or both compared months.
- **7.** Year-on-year growth rate it compares the level of each variable between the current period and the same period of the previous year. The evolution of this rate is less biased from seasonal fluctuations. However, it might be influenced by these types of effects when referred to a specific period of time.
- **8.** Revisions: data available in this press release include regular revisions of the previous three months (according to the Revisions Policy applicable for the International Trade in Goods statistics) due to the replacement of estimations by new data from the enterprises and, in a lesser dimension, due to the corrections in data made by the reporting enterprises. The following table shows the impact of those revisions in the year-on-year growth rate (three months) disseminated in the previous press release:

YEAR-ON-YEAR GROWTH RATE - MAY TO JULY 2016							
	PREVIOUS PUBLICATION	CURRENT PUBLICATION					
EXPORTS	-2.3	-2.3					
IMPORTS	-3.9	-3.9					

9. The BEC nomenclature - Classification by Broad Economic Categories doesn't include the *Gold for monetary use* (CN 71082000) and *Coins, including coins with legal tender* (*except medals, coins mounted in objects of personal adornment coins with character collectibles with numismatic value, waste and scrap*) (CN 71189000). The sum of the various categories of the BEC may not match with total trade, due to these exclusions and also for confidentiality reasons.
