

29 November 2017

Business and Consumer Surveys November 2017

## Consumer confidence indicator increases and economic climate indicator stabilizes

The Consumer confidence indicator increased in October and November, after the interruption in the two previous months of the positive path observed since the beginning of 2013.

The economic climate indicator stabilized in the last three months, after a decrease in August. In November, the confidence indicators increased in Manufacturing Industry, Services and Trade and decreased in Construction and Public Works.

The evolution of the Consumer<sup>1</sup> confidence indicator in November reflected the positive contribution of the perspectives on savings and on the household's financial situation, while the perspectives on the evolution of the unemployment showed a null contribution and the perspectives on the country's economic situation presented a negative one. Without using three-month moving averages the Consumer confidence indicator decreased in the last month due to the negative contribution of all components.

In Manufacturing Industry, the confidence indicator increased between September and November, after the decrease in the two previous months, resuming the positive path started in June 2016. In the reference month, the production perspectives contributed positively to the indicator evolution, while the opinions on global demand and on the evolution of stocks of finished products presented a negative contribution. The confidence indicator for Construction and Public Works decreased in the last two months, after reaching in September the maximum level since July 2002. In November, this evolution was due to the negative contribution of employment perspectives, since the opinions on the order books stabilized. The confidence indicator for Trade increased in November, after stabilizing in the previous month, reflecting a positive contribution of the perspectives on the business activity and the opinions on sales evolution, whereas the opinions on the volume of stocks contributed negatively. The Services' confidence indicator increased in the reference month, due to the positive contribution of the opinions and perspectives on demand, while the opinions on the business situation showed a negative contribution.

<sup>&</sup>lt;sup>1</sup> Unless stated otherwise, the analysis in this press release refers to three-month moving averages for the monthly series and to two-quarter moving averages for the quarterly ones.

## **Notes**

The Business and Consumer Qualitative Surveys published by Statistics Portugal are developed in the framework of the harmonized EU Business and Consumer Surveys Programme of the European Commission (EC) DG-ECFIN (*Directorate-General for Economic and Financial Affairs*) and are financially supported in the framework of the agreement signed between these two institutions. The questionnaires are harmonized among the European countries, as well as the respective confidence indicators' methodology. The surveys' results are sent to the EC in effective values, and, therefore, the seasonally adjusted values published by the EC are computed by this entity and presented without using three months moving averages. The seasonal adjustment method used by the EC is available on the user guide, accessible in:

http://ec.europa.eu/economy finance/db indicators/surveys/documents/bcs user quide en.pdf

The text and graphics of this press release are based on three terms moving averages, for the monthly variables, and two terms, for the quarterly variables, and on original values, except the cases of the seasonally adjusted series. The seasonal adjustment uses the X13-Arima method (combination of moving averages process and auto-regressive integrated moving average models) developed in the JDemetra+2 software provided by Eurostat. This application relies on the use of probabilistic models to correct seasonal effects from the original series. The seasonal treatment is updated in May, for monthly and quarterly series, which might result on a revision of the series previously published. The use of moving averages smoothes out the series by removing the irregular movements, allowing the detection of the short-term trends. Since the average is not centred (the information is used to analyse the evolution of the last month) there is a small lag compared with the trend that is supposed to detect.

In order to compare the difference between original and moving average series, the graphical representation of the confidence indicators presents both types of series. The average of the economic climate indicator is computed from the beginning of the series to the reference month.

The balances of the questions are the difference between the positive and negative answers, that is Balance=%answer (+)-%answer (-). In the Consumer Survey there are questions with more than one option of positive/negative answer. In these cases, to the most positive/negative answers is given the weight 1 and to the others the weight 0.5, that is Balance= [%answer (++)\*1+%answer (+)\*0.5] - [%answer (-)\*1+%answer (-)\*0.5]. The percentage of answers that correspond to "equal" is not considered.

# **ECONOMIC CLIMATE INDICATOR**

Synthetic Indicator estimated using balances of questions from the Manufacturing Industry, Trade, Construction and Public Works and Services Surveys. The method for this indicator uses the factor analysis and the estimated series (the common component) is calibrated using the GDP change rates. The questions that integrate the indicator are:

- Qualitative Manufacturing Industry survey
  - How has your production developed over the past 3 months? It has... 1. + increased; 2. = remained unchanged; 3. decreased
  - Do you consider your current overall order books to be...? 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
  - Do you consider your current export order books to be...? 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
  - Do you consider your current stock of finished products to be...? 1. + too large (above normal); 2. = adequate (normal for the season); 3. too small (below normal).
  - How do you expect your production to develop over the next 3 months? It will... 1. + increase; 2. = remain unchanged; 3.
     decrease.

<sup>&</sup>lt;sup>2</sup> JDemetra+ is an open source tool for seasonal adjustment, available in: <a href="http://www.cros-portal.eu/content/jdemetra">http://www.cros-portal.eu/content/jdemetra</a>

## **Notes**

- **Oualitative Trade survey**
- How has (have) your business activity (sales) developed over the past 3 months? It has... (They have...) 1. + improved (increased); 2. = remained unchanged; 3. deteriorated (decreased).
- How do you expect your orders placed with suppliers to change over the next 3 months? They will... 1. + increase; 2. = remain unchanged; 3. decrease.
- Your business activity is currently...: 1. + more than sufficient; 2. = sufficient; 3. not sufficient.
- How do you expect your business activity (sales) to change over the next 3 months? It (They) will... 1. + improve (increase); 2. = remain unchanged 3. deteriorate (decrease).

- Qualitative Construction and Public Works survey

- How has your building activity developed over the past 3 months? It has...; 1. + increased; 2. = remained unchanged; 3. decreased.
- Do you consider your current overall order books to be...?: 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
- How do you expect your firm's total employment to change over the next 3 months? It will...; 1. + increase; 2. = remain unchanged; 3. decrease.
- Qualitative Services survey
  - How has your business situation developed over the past 3 months? It has... 1. + improved; 2. = remained unchanged; 3. deteriorated.
  - How has demand (turnover) for your company's services changed over the past 3 months? It has... 1. + increased; 2. = remained unchanged; 3. decreased.
  - How do you expect the demand (turnover) for your company's services to change over the next 3 months? It will...1. + increase; 2. = remain unchanged; 3. decrease.

#### SECTORIAL CONFIDENCE INDICATORS

The confidence indicators (CI) are the result of the arithmetic average of balance of the following questions:

- Manufacturing Industry confidence indicator
  - Do you consider your current overall order books to be...? 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
  - How do you expect your production to develop over the next 3 months? It will... 1. + increase; 2. = remain unchanged; 3. decrease.
  - [Inverted Sign] Do you consider your current stock of finished products to be...? 1. + too large (above normal); 2. = adequate (normal for the season); 3. too small (below normal).
- Trade confidence indicator
  - How has (have) your business activity (sales) developed over the past 3 months? It has... (They have...) 1. + improved (increased); 2. = remained unchanged; 3. deteriorated (decreased).
  - How do you expect your business activity (sales) to change over the next 3 months? It (They) will... 1. + improve (increase); 2. = remain unchanged 3. deteriorate (decrease).
  - [Inverted Sign] Do you consider the volume of stock you currently hold to be...? 1. + too large (above normal); 2. = adequate (normal for the season); 3. too small (below normal).
- Construction and Public Works confidence indicator
  - Do you consider your current overall order books to be...?: 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
  - How do you expect your firm's total employment to change over the next 3 months? It will...; 1. + increase; 2. = remain unchanged; 3. decrease.
- Services confidence indicator
  - How has your business situation developed over the past 3 months? It has... 1. + improved; 2. = remained unchanged; 3. deteriorated.
  - How has demand (turnover) for your company's services changed over the past 3 months? It has... 1. + increased; 2. = remained unchanged; 3. decreased.
  - How do you expect the demand (turnover) for your company's services to change over the next 3 months? It will... 1. + increase; 2. = remain unchanged; 3. decrease.

Business and Consumer Surveys - November 2017

# **Notes**

The surveys used in the calculation of the above mentioned confidence indicators registered the following weighted response rates:

Qualitative Business Surveys	Sample <sup>(1)</sup>	Weighted Response Rate <sup>(3)</sup>							
Qualitative Busilless Surveys	Sample	2016 <sup>(2)</sup>	November 2017						
Manufacturing Industry	1132	97.1%	97.6%						
Construction and Public Works	734	93.4%	98.0%						
Trade	1380	98.4%	95.0%						
Services	1457	98.4%	97.9%						

<sup>((1)</sup> December 2016

## **CONSUMER CONFIDENCE INDICATOR**

The consumer confidence indicator results of the arithmetic average of the balances of the following questions:

- How do you expect the financial position of your household to change over the next 12 months? It will...1. + + get a lot better; 2. + get a little better; 3.= stay the same; 4.- get a little worse; 5. - get a lot worse; 6. N don't know.
- How do you expect the general economic situation in this country to develop over the next 12 months? It will... 1. + + get a lot better; 2. + get a little better; 3.= stay the same; 4.- get a little worse; 5. - get a lot worse; 6. N don't know.
- [Inverted Sign] How do you expect the number of people unemployed in this country to change over the next 12 months? The number will...: 1. + + increase sharply; 2. + increase slightly; 3. = remain the same; 4. fall slightly; 5. - fall sharply; 6. N don't know.
- Over the next 12 months. how likely is it that you save any money? 1. + + very likely; 2.+ fairly likely; 3.- not likely; 4. not at all likely; 5. N don't know.

# The qualitative consumer survey registered the following response rates:

O l'italian Camanan	Response rate							
Qualitative Consumer Survey	Average of the last twelve months	November 2017						
Survey	68.1%	72.8%						

## **ABBREVIATIONS**

Balances: Weighted difference between the percentages of positive and negative responses.

E.V.: Effective Values.

S.A.: Seasonally Adjusted values. 3MMA: Three-Months Moving Average. 2QMA: Two-Quarters Moving Average

<sup>(2)</sup> Annual average.

<sup>(3)</sup> Corresponds to the ratio between the turnover of the firms that answered to the survey and the turnover of all the firms in the sample.
