Business and Consumer Surveys May 2019

Consumer confidence indicator increases and economic climate indicator decreases

The Consumer confidence indicator increased in April and May, after declining in the five previous months.

The economic climate indicator¹ decreased in May, after stabilizing in the previous month. In May, the confidence indicators decreased in Manufacturing Industry, in Trade and in Construction and Public Works and increased in Services.

The evolution of the Consumer² confidence indicator reflected the positive contributions of the perspectives regarding major purchases, the opinions and expectations of the household's financial situation, stronger in the first case, while the opinions on the evolution of the country's economic situation contributed negatively.

In Manufacturing Industry, the confidence indicator decreased between January and May, resuming the descendent movement started at the beginning of 2018. The evolution of the indicator in the last three months reflected the negative contribution of all components, production perspectives and opinions on global demand and on the evolution of *stocks* of finished products. The confidence indicator for Construction and Public Works decreased in May, after increasing in the previous month, due to the negative contribution of both components, opinions on the order books and employment perspectives. The confidence indicator for Trade decreased between March and May, reflecting in the last two month the negative contribution of all components, opinions on sales evolution and on volume of *stocks* and perspectives on the business activity. The Services' confidence indicator increased in May, after decreasing in the two previous months. The positive evolution of the indicator was driven by the positive contributions of balances of opinions on orders and on the business situation, while the expectations on the evolution of demand contributed negatively.

¹From this publication onwards, the economic climate indicator is calculated based on seasonally adjusted series.

²Unless stated otherwise, the analysis in this press release refers to three-month moving averages for the monthly series and to two-quarter moving averages for the quarterly ones.

^{*} Series average since its beginning till the current observation.

Business and Consumer Surveys - May 2019

^{**} In May 2003 a break in the series occurred, until that moment the reference period was the month under review and afterwards it refers to the past 3 months.

^{***} In May 2003 a break in the series occurred, until that moment the question referred to the next 6 months.

^{****} From September 2004 onwards Services sector was included, besides industry, trade and construction. From May 2019, the indicator includes seasonally adjusted series.

Notes

The Business and Consumer Qualitative Surveys published by Statistics Portugal are developed in the framework of the harmonized EU Business and Consumer Surveys Programme of the European Commission (EC) DG-ECFIN (*Directorate-General for Economic and Financial Affairs*) and are financially supported in the framework of the agreement signed between these two institutions. The questionnaires are harmonized among the European countries, as well as the respective confidence indicators' methodology. The surveys' results are sent to the EC in effective values, and, therefore, the seasonally adjusted values published by the EC are computed by this entity and presented without using three months moving averages. The seasonal adjustment method used by the EC is available on the user guide, accessible in:

http://ec.europa.eu/economy finance/db indicators/surveys/documents/bcs user quide en.pdf

The text and graphics of this press release are based on three terms moving averages, for the monthly variables, and two terms, for the quarterly variables, and on original values, except the cases of the seasonally adjusted series. The seasonal adjustment uses the X13-Arima method (combination of moving averages process and auto-regressive integrated moving average models) developed in the JDemetra+³ software provided by Eurostat. This application relies on the use of probabilistic models to correct seasonal effects from the original series. The seasonal treatment is updated in May, for monthly and quarterly series, which might result on a revision of the series previously published. The use of moving averages smoothes out the series by removing the irregular movements, allowing the detection of the short-term trends. Since the average is not centred (the information is used to analyse the evolution of the last month) there is a small lag compared with the trend that is supposed to detect.

In order to compare the difference between original and moving average series, the graphical representation of the confidence indicators presents both types of series. The average of the economic climate indicator is computed from the beginning of the series to the reference month.

The balances of the questions are the difference between the positive and negative answers, that is Balance=%answer (+)-%answer (-). In the Consumer Survey there are questions with more than one option of positive/negative answer. In these cases, to the most positive/negative answers is given the weight 1 and to the others the weight 0.5, that is Balance= [%answer (++)*1+%answer (+)*0.5] - [%answer (--)*1+%answer (-)*0.5]. The percentage of answers that correspond to "equal" is not considered.

ECONOMIC CLIMATE INDICATOR

Synthetic Indicator estimated using balances of questions from the Manufacturing Industry, Trade, Construction and Public Works and Services Surveys. The method for this indicator uses the factor analysis and the estimated series (the common component) is calibrated using the GDP change rates. The questions that integrate the indicator are:

- Qualitative Manufacturing Industry survey
 - How has your production developed over the past 3 months? It has... 1. + increased; 2. = remained unchanged; 3. decreased.
 - Do you consider your current overall order books to be...? 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
 - Do you consider your current export order books to be...? 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
 - How do you expect your production to develop over the next 3 months? It will... 1. + increase; 2. = remain unchanged; 3.
 decrease. (seasonally adjusted)

Business and Consumer Surveys - May 2019

³ JDemetra+ is an open source tool for seasonal adjustment, available in: http://www.cros-portal.eu/content/jdemetra

Notes

- Qualitative Trade survey
 - How has (have) your business activity (sales) developed over the past 3 months? It has... (They have...) 1. + improved (increased); 2. = remained unchanged; 3. deteriorated (decreased). (seasonally adjusted)
 - How do you expect your orders placed with suppliers to change over the next 3 months? They will... 1. + increase; 2. = remain unchanged; 3. decrease. (seasonally adjusted)
 - Your business activity is currently...: 1. + more than sufficient; 2. = sufficient; 3. not sufficient.
 - How do you expect your business activity (sales) to change over the next 3 months? It (They) will... 1. + improve (increase); 2. = remain unchanged 3. deteriorate (decrease). (seasonally adjusted)
- Qualitative Construction and Public Works survey
 - How has your building activity developed over the past 3 months? It has...; 1. + increased; 2. = remained unchanged; 3. decreased.
 - Do you consider your current overall order books to be...?: 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
 - How do you expect your firm's total employment to change over the next 3 months? It will...; 1. + increase; 2. = remain unchanged; 3. decrease.
- Qualitative Services survey
 - How has your business situation developed over the past 3 months? It has... 1. + improved; 2. = remained unchanged; 3.
 deteriorated. (seasonally adjusted)
 - How has demand (turnover) for your company's services changed over the past 3 months? It has... 1. + increased; 2. = remained unchanged; 3. decreased. (seasonally adjusted)
 - How do you expect the demand (turnover) for your company's services to change over the next 3 months? It will...1. + increase; 2. = remain unchanged; 3. decrease. (seasonally adjusted)

Since the economic climate indicator does not correspond to the average of the sectoral confidence indicators, its behaviour may differ, in specific situations, from the aggregate behaviour of the confidence indicators.

SECTORIAL CONFIDENCE INDICATORS

The confidence indicators (CI) are the result of the arithmetic average of balance of the following questions:

- Manufacturing Industry confidence indicator
 - Do you consider your current overall order books to be...? 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
 - How do you expect your production to develop over the next 3 months? It will... 1. + increase; 2. = remain unchanged; 3. decrease.
 - [Inverted Sign] Do you consider your current stock of finished products to be...? 1. + too large (above normal); 2. = adequate (normal for the season); 3. too small (below normal).
- Trade confidence indicator
 - How has (have) your business activity (sales) developed over the past 3 months? It has... (They have...) 1. + improved (increased); 2. = remained unchanged; 3. deteriorated (decreased).
 - How do you expect your business activity (sales) to change over the next 3 months? It (They) will... 1. + improve (increase); 2. = remain unchanged 3. deteriorate (decrease).
 - [Inverted Sign] Do you consider the volume of stock you currently hold to be...? 1. + too large (above normal); 2. = adequate (normal for the season); 3. too small (below normal).
- Construction and Public Works confidence indicator
 - Do you consider your current overall order books to be...?: 1. + more than sufficient (above normal); 2. = sufficient (normal for the season); 3. not sufficient (below normal).
 - How do you expect your firm's total employment to change over the next 3 months? It will...; 1. + increase; 2. = remain unchanged; 3. decrease.

Notes

- Services confidence indicator
 - How has your business situation developed over the past 3 months? It has... 1. + improved; 2. = remained unchanged; 3.
 deteriorated.
 - How has demand (turnover) for your company's services changed over the past 3 months? It has... 1. + increased; 2. = remained unchanged; 3. decreased.
 - How do you expect the demand (turnover) for your company's services to change over the next 3 months? It will... 1. + increase; 2. = remain unchanged; 3. decrease.

The surveys used in the calculation of the above mentioned confidence indicators registered the following weighted response rates:

| Qualitative Business Surveys | Sample ⁽¹⁾ | Weighted Response Rate ⁽³⁾ | | | | | | | |
|-------------------------------|-----------------------|---------------------------------------|----------|--|--|--|--|--|--|
| Qualitative Busilless Surveys | Sample | 2018 ⁽²⁾ | May 2019 | | | | | | |
| Manufacturing Industry | 1.118 | 96.3% | 96.5% | | | | | | |
| Construction and Public Works | 710 | 91.6% | 89.8% | | | | | | |
| Trade | 1.363 | 97.5% | 96.0% | | | | | | |
| Services | 1.448 | 97.1% | 96.4% | | | | | | |

⁽⁽¹⁾ December 2018

CONSUMER CONFIDENCE INDICATOR

The consumer confidence indicator results of the arithmetic average of the balances of the following questions:

- How has the financial situation of your household changed over the last 12 months? It has...1. + + got a lot better; 2. + got a little better; 3.= stayed the same; 4.- got a little worse; 5. - got a lot worse; 6. N don't know.
- How do you expect the financial position of your household to change over the next 12 months? It will...1. + + get a lot better; 2. + get a little better; 3.= stay the same; 4.- get a little worse; 5. - get a lot worse; 6. N don't know.
- How do you expect the general economic situation in this country to develop over the next 12 months? It will... 1. + + get a lot better; 2. + get a little better; 3.= stay the same; 4. get a little worse; 5. - get a lot worse; 6. N don't know.
- Compared to the past 12 months, do you expect to spend more or less money on major purchases (furniture, electrical/electronic devices, etc.) over the next 12 months? I will spend...1. + +much more; 2. + a little more; 3. a little less; 4. much less; 5. N don't know.

The qualitative consumer survey registered the following response rates:

| 0 1'11' 0 | Response rate | | | | | | | | |
|-----------------------------|-----------------------------------|----------|--|--|--|--|--|--|--|
| Qualitative Consumer Survey | Average of the last twelve months | May 2019 | | | | | | | |
| Survey | 71.8% | 74.6% | | | | | | | |

ABBREVIATIONS

Balances: Weighted difference between the percentages of positive and negative responses.

E.V.: Effective Values.

S.A.: Seasonally Adjusted values. 3MMA: Three-Months Moving Average. 2QMA: Two-Quarters Moving Average

⁽²⁾ Annual average.

⁽³⁾ Corresponds to the ratio between the turnover of the firms that answered to the survey and the turnover of all the firms in the sample.
