Services Turnover, Employment, Wages and salaries and Hours worked Indexes September 2008

Positive variation of services turnover

In September, the year-on-year rate of change of services turnover was 2.0%, up by 4.6 percentage points compared to the observed in the previous month. This development was partially due to calendar effects (less two working days in August and more two in September compared with the same months in 2007). Employment, wages and salaries and hours worked increased by 0.3%, 2.7% and 3.8%, respectively.
