

1986 - 2006

Portugal - 20 anos de Integração Europeia/Portugal - 20 years European Integration

When the 20 years of Portugal's accession to European Union, are celebrated and when Portugal holds the Presidency of the Council of the European Union, Statistics Portugal, the European Commission Representation in Portugal and the European Parliament Office in Portugal, jointly present the publication entitled "Portugal 20 anos de Integração Europeia / Portugal 20 years of European Integration".

This publication sets forth indicators that in an easy and friendly way, show how Portugal has developed over the 20 years since its accession to the European Union and, whenever possible, compares the country with the EU-15 and EU-25 levels.

Although the aim of integration to EU project had been fully assimilated by the Portuguese society, the set of statistical information now made available shows clearly areas of major success while revealing others in which the necessary integration has not yet been fully achieved.

The selected statistical information is grouped into four major chapters:

- The Territory – includes topics such as: Environment and Population;
- The People – comprises several topics, to name only two: Education and Training and Health;
- The Economic Activity – includes among others: Economic Structure, Business and Productive Structure and Technological Effort;
- The State – addresses issues such as Public Accounts and E-Government.

The information is displayed by using graphs and cartograms which are followed closely by brief analytical texts, drawing attention to the most relevant aspects that have characterised the period under analysis.

“Portugal 20 anos de Integração Europeia / Portugal 20 years of European Integration” is a bilingual publication (Portuguese and English) and is available in PDF format at the Internet sites of the three sponsoring institutions:
