ECONOMIC ACCOUNTS FOR AGRICULTURE – 2010

1st Estimate

The Income generated by Agriculture should increase 6.8% in 2010

According to the first estimate for 2010 on Economic Accounts for Agriculture (EAA), the Income from the Agricultural Activity, per annual working unit, should increase, in real terms, 6.8%. Although the small nominal decrease of Gross Value Added (GVA) in agriculture (-0.6%), Factor Income should raise 5.7%, as a consequence of "Other subsidies on production" increase (+21.0%). Agricultural Labour Input should continue the downwards trend and a decline of 1.9% is envisaged.
