## ECONOMIC ACCOUNTS FOR AGRICULTURE – 2012

1<sup>st</sup> Estimate

---

### **INCOME GENERATED BY AGRICULTURE SHOULD INCREASE 9.3% IN 2012, AFTER A DECREASE OF 11.9% IN 2011**

According to the first estimate on Economic Accounts for Agriculture (EAA) for 2012, the Income from Agricultural Activity, per annual working unit, should increase, in real terms (+9.3%). It is foreseen a Factor Income nominal increase (8.0%), as a consequence of an envisaged augment of "Other Subsidies on Production" (+23.6%), since Gross Value Added (GVA) is expected to slightly decrease (-0.3%).
