

13 May, 2013

CONSUMER PRICES INDEX April 2013

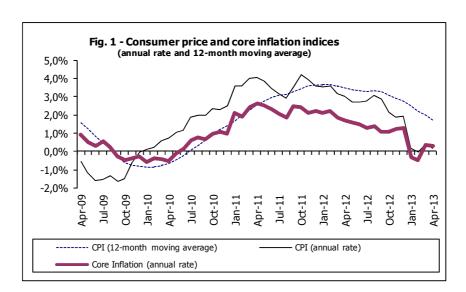

The CPI 12-month average rate was 1.7% in April

The CPI 12-month average rate of change decreased from 2.0% in March to 1.7% in April. The core inflation index, which excludes unprocessed food and energy, was 0.8% (1.0% in March).

The HICP 12-month average rate decreased from 2.0% in March to 1.8% in April. In March 2013 the gap between the Portuguese and the Euro-area HICP 12-month average rate was -0.3 percentage points (p.p.). In April, the Portuguese HICP 12-month average rate is 0.4 p.p. lower than Eurostat's flash estimate for the whole area¹.

The 12-month average rate of change of the Portuguese Consumer Price Index (CPI) decreased to 1.7% in April 2013 (2.0% in March). The 12-month core inflation rate, which excludes unprocessed food and energy, decreased 0.2 p.p. comparing with the rate observed in March to 0.8% in April. The main reductions were recorded in COICOP divisions 4 (Housing, water, electricity, gas and other fuels) and 7 (Transports).

In April 2013, the annual inflation rate measured by the CPI decreased 0.3 p.p. to 0.2%, comparing with the rate observed in the previous month.

The largest downward pressure on the overall annual rate of change came from changes in prices of COICOP division 7 (Transports).

Recognizing the Contributions of Statistics to Societies Worldwide www.statistics2013.org

 $^{^1}$ Estimate for the annual rate of change of the Euro area HICP, published 30^{th} April 2013. Consumer Price Index - April 2013

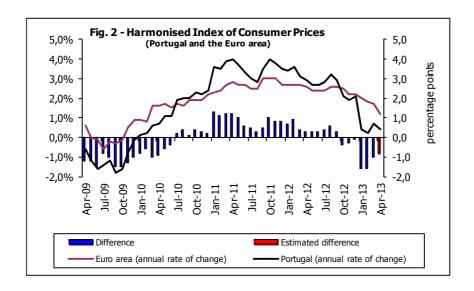

The annual core inflation rate, measured by the CPI excluding energy and unprocessed food products, was 0.3%, unchanged from the previous month.

In April, the CPI monthly rate was 0.0% (1.7% in March 2013 and 0.3% in April 2012). This result was mostly due to the contribution of changes in prices of COICOP division 3 (Clothing and footwear) and 7 (Transports).

In April 2013, the HICP 12-month average rate decreased to 1.8% (2.0% in March 2013).

In March 2013 the gap between the Portuguese and the Euro-area HICP 12-month average rate was -0.3 p.p.. In April, the Portuguese HICP 12-month average rate is 0.4 p.p. lower than Eurostat's flash estimate for the whole area².

The HICP annual rate of change decreased to 0.4% (0.7% in March 2013). The HICP monthly rate of change was 0.1% (1.7% and 0.3% respectively in the previous month and in April 2012). In March 2013 the gap between the annual rate of change of the Euro area and the Portuguese HICP was -1.0 p.p. and it is estimated to have moved to -0.8 p.p. in April 2013.

Housing Rents

In national terms, in April 2013, compared with March 2013, the average value of rents by net area increased 0.2%.

The increase in the average value of rents was observed in all regions except Alentejo and Autonomous Region of Madeira, where it was observed a decrease. The most relevant increase was in the region of Algarve (0.4%).

 $^{^2}$ Estimate for the annual rate of change of the Euro area HICP, published 30^{th} April 2013. Consumer Price Index – April 2013

Consumer Price Index

The Consumer Price Index (CPI) measures the change over time of the prices of a certain basket of goods and services bought by a "typical" consumer. The CPI has been designed to capture price changes and not to measure price levels. The CPI 2012=100 weighting structure and the sample of goods and services included in the basket are a result of the combination of three fundamental sources of information recently made available: the 2011 Census, the Household Expenditure Survey 2010/2011 and the final 2010 and preliminary 2011 results of the Portuguese National Accounts. Administrative data at a more detailed level is also used.

From 2013 onwards the CPI will be updated every year in a more effective way with the most recent information on prices and quantities.

The CPI is compiled through the aggregation of seven regional price indexes and the goods and services included in the index are grouped according to the COICOP classification.

¹COICOP: Classification Of Individual Consumption by Purpose

Monthly rate

The monthly rate is the change in the index of a certain month compared with the index of the previous month expressed as a percentage. Although up-to-date, this measure can be affected by seasonal and other effects.

Annual rate

The annual rate is the change in the index of a certain month compared with the index of the same month in the previous year expressed as a percentage. In the presence of a stable seasonal pattern, seasonal effects do not influence this measure.

12-month average rate

The 12-month average rate is the change in the average index of one year compared with the average index of the previous year expressed as a percentage. This moving average is less sensitive to transient changes in prices.

Core inflation index (all items CPI excluding unprocessed food and energy products)

The core inflation index is compiled by excluding the prices of unprocessed food and energy products from the all items CPI. The primary objective of this index is to capture the underlying inflation pressures in the economy.

Harmonised Index of Consumer Prices

The Harmonised Index of Consumer Prices (HICP) is compiled in each member state of the European Union for the purposes of inflation comparisons across EU countries, as required by the Treaty on European Union¹. This index plays an important role as a guideline for the achievement of the European System of Central Banks primary objective: price stability. In 1998, the European Central Bank adopted the HICP as "the most appropriate price measure" for its definition of price stability in the Euro area².

The current HICP (2005 = 100) is produced in each Member State following a harmonized methodology developed by experts in the field of price statistics, under the Eurostat's "Price Statistics Working Group". From the methodological point of view, there are no major differences between the HICP and CPI. However, the different scope of coverage leads to differences in the weighting structure, mainly in Restaurants and hotels. This is mostly an effect of the inclusion of non-residents expenditure ("tourists") in the HICP and the corresponding exclusion from the CPI.

Additional information on the methodology of the HICP can be found on the Eurostat website at http://epp.eurostat.ec.europa.eu/portal/page/portal/hicp/introduction.

Presentation of data and rounding rules

With the release of the January 2013 CPI indices are published with base 100 in the year 2012.

Due to rounding procedures, those indices may not reproduce exactly the published rates of change. However, one should bear in mind that the published rates keep unchanged.

In this press release the descriptive analysis is based on rounded values to one decimal.
