## **CONSUMER PRICES INDEX**

August 2013

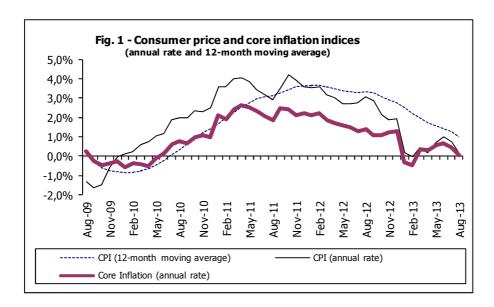

## The CPI 12-month average rate was 1.0% in August

The CPI 12-month average rate of change decreased from 1.3% in July to 1.0% in August. The core inflation index, which excludes unprocessed food and energy, was 0.5% (0.6% in July 2013).

The HICP 12-month average rate decreased from 1.4% in July to 1.1% in August. In July 2013 the Portuguese HICP 12-month average rate was 0.6 percentage points (p.p.) lower than the rate observed for the Euro-area. In August, the gap between the Portuguese HICP 12-month average rate and Eurostat's flash estimate for the whole area<sup>1</sup> should increase 0.1 p.p..

The 12-month average rate of change of the Portuguese Consumer Price Index (CPI) decreased to 1.0% in August 2013 (1.3% in July). The 12-month core inflation rate, which excludes unprocessed food and energy, decreased 0.1 p.p. to 0.5%. The main reduction was recorded in COICOP division 4 (Housing, water, electricity, gas and other fuels) while the main increase was recorded in COICOP division 6 (Health).

In August 2013, the annual inflation rate measured by the CPI decreased by 0.6 p.p. to 0.2%, comparing with the rate observed in the previous month.

<sup>&</sup>lt;sup>1</sup> Estimate for the annual rate of change of the Euro area HICP, published 30<sup>th</sup> August 2013. Consumer Price Index – August 2013

1/6

### **2013 International Year of Statistics**

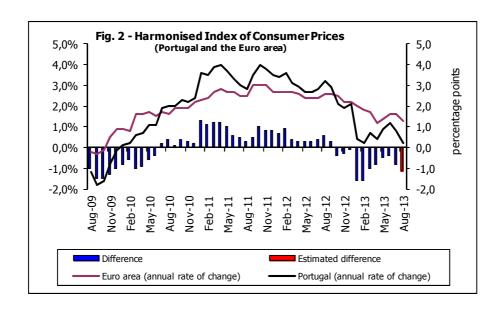

The largest downward pressure on the overall annual rate of change came from changes in prices of COICOP division 3 (Clothing and footwear).

The annual core inflation rate in August, measured by the CPI excluding energy and unprocessed food, was 0.0% (0.5% in July). In August, the CPI monthly rate was -0.7% (-0.2% in July 2013 and -0.1% in August 2012). The largest downward pressure came from changes in prices of COICOP division 3 (Clothing and footwear).

In August 2013, the HICP 12-month average rate decreased to 1.1% (1.4% in July 2013).

In July 2013 the Portuguese HICP 12-month average rate was 0.6 p.p. lower than the rate observed for the Euroarea. In August, the gap between the Portuguese HICP 12-month average rate and Eurostat's flash estimate for the whole area<sup>2</sup> is estimated to increase by 0.1 p.p..

The HICP annual rate of change decreased to 0.2% (0.8% in July 2013). The HICP monthly rate of change was -0.7% (-0.2% and -0.1% respectively in the previous month and in August 2012). In July 2013 the annual rate of change of the Euro area was 0.8 p.p. higher than the annual rate of change of the Portuguese HICP. That difference is estimated to have increased to 1.1 p.p. in August 2013.

#### **Housing Rents**

In August 2013, compared with July 2013, the average value of rents by net area for the whole country decreased 0.1%.

The most relevant decreases were registered in the Alentejo region (-0.4%) and in the Lisbon region (-0.2%). The only increase was registered in the Algarve region, where the value of rents by net area increased 0.4%.

 $<sup>^2</sup>$  Estimate for the annual rate of change of the Euro area HICP, published  $30^{th}$  August 2013. Consumer Price Index – August 2013

#### **Consumer Price Index**

The Consumer Price Index (CPI) measures the change over time of the prices of a certain basket of goods and services bought by a "typical" consumer. The CPI has been designed to capture price changes and not to measure price levels. The CPI 2012=100 weighting structure and the sample of goods and services included in the basket are a result of the combination of three fundamental sources of information recently made available: the 2011 Census, the Household Expenditure Survey 2010/2011 and the final 2010 and preliminary 2011 results of the Portuguese National Accounts. Administrative data at a more detailed level is also used.

From 2013 onwards the CPI will be updated every year in a more effective way with the most recent information on prices and quantities.

The CPI is compiled through the aggregation of seven regional price indexes and the goods and services included in the index are grouped according to the COICOP classification.

### Table 1: CPI - COICOP1 Divisions

01	Food and non-alcoholic beverages	07	Transports
02	Alcoholic beverages and tobacco	80	Communications
03	Clothing and footwear	09	Recreation and culture
04	Housing, water, electricity, gas and other fuels	10	Education
05	Furnishings, household equipment and routine maintenance of the house	11	Restaurants and hotels
06	Health	12	Miscellaneous goods and services

<sup>&</sup>lt;sup>1</sup>COICOP: Classification Of Individual Consumption by Purpose

#### Monthly rate

The monthly rate is the change in the index of a certain month compared with the index of the previous month expressed as a percentage. Although up-to-date, this measure can be affected by seasonal and other effects.

#### **Annual rate**

The annual rate is the change in the index of a certain month compared with the index of the same month in the previous year expressed as a percentage. In the presence of a stable seasonal pattern, seasonal effects do not influence this measure.

#### 12-month average rate

The 12-month average rate is the change in the average index of one year compared with the average index of the previous year expressed as a percentage. This moving average is less sensitive to transient changes in prices.

# Core inflation index (all items CPI excluding unprocessed food and energy products)

The core inflation index is compiled by excluding the prices of unprocessed food and energy products from the all items CPI. The primary objective of this index is to capture the underlying inflation pressures in the economy.

### **Harmonised Index of Consumer Prices**

The Harmonised Index of Consumer Prices (HICP) is compiled in each member state of the European Union for the purposes of inflation comparisons across EU countries, as required by the Treaty on European Union<sup>1</sup>. This index plays an important role as a guideline for the achievement of the European System of Central Banks primary objective: price stability. In 1998, the European Central Bank adopted the HICP as "the most appropriate price measure" for its definition of price stability in the Euro area<sup>2</sup>.

The current HICP (2005 = 100) is produced in each Member State following a harmonized methodology developed by experts in the field of price statistics, under the Eurostat's "Price Statistics Working Group". From the methodological point of view, there are no major differences between the HICP and CPI. However, the different scope of coverage leads to differences in the weighting structure, mainly in Restaurants and hotels. This is mostly an effect of the inclusion of non-residents expenditure ("tourists") in the HICP and the corresponding exclusion from the CPI.

Additional information on the methodology of the HICP can be found on the Eurostat website at http://epp.eurostat.ec.europa.eu/portal/page/portal/hicp/introduction.

### Presentation of data and rounding rules

With the release of the January 2013 CPI indices are published with base 100 in the year 2012.

Due to rounding procedures, those indices may not reproduce exactly the published rates of change. However, one should bear in mind that the published rates keep unchanged.

In this press release the descriptive analysis is based on values rounded to one decimal.

### **Next press release**

The August 2013 CPI/HICP will be released on October 10<sup>th</sup> 2013
