

13 January 2020

Consumer Price Index
December 2019

**The CPI annual average rate of change was 0.3% in 2019
and the rate of change on a year earlier was 0.4% in December**

In 2019, the average rate of change of the Portuguese Consumer Price Index (CPI) was 0.3% (1.0% in 2018). Excluding energy and unprocessed food, the average rate of change was 0.5% in 2019 (0.7% in the previous year).

The CPI annual rate moved from 0.3% in November to 0.4% in December 2019. The annual core inflation rate, which excludes energy and unprocessed food products components, was 0.4% (0.6% in the previous month). The CPI monthly rate was -0.1% (the same rate in November and -0.2% in December 2018).

In 2019, the annual average rate of change of the Portuguese Harmonised Index of Consumer Prices (HICP) was 0.3% (1.2% in 2018). In December 2019, the HICP annual rate of change was 0.4% (0.2% in the previous month), 0.9 percentage points (p.p.) below the rate estimated by Eurostat for the Euro area.

**Fig. 1 - Consumer price and core inflation indices
(annual rate and 12-month moving average)**

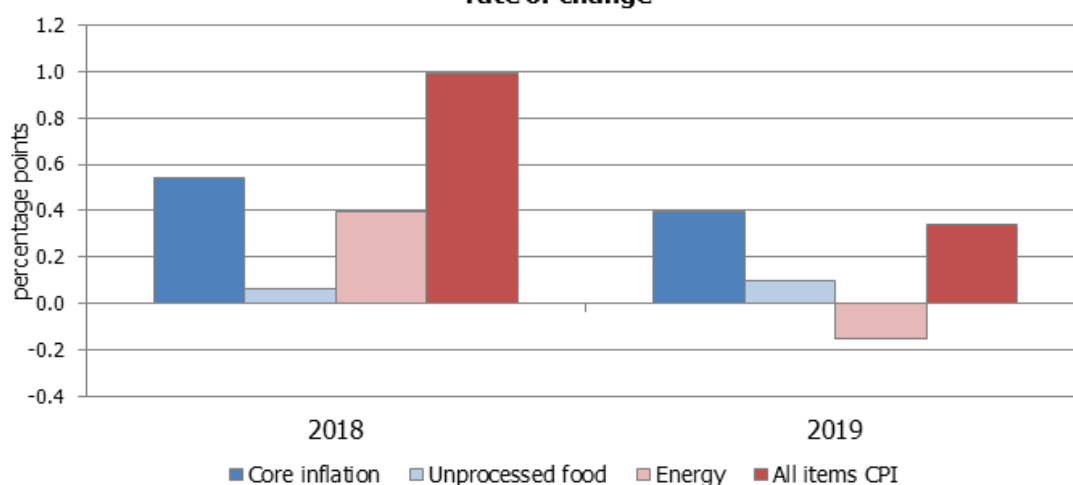

Consumer Price Index (base 100 = 2012)¹

The annual average rate of change of the Portuguese Consumer Price Index (CPI) was 0.3% in 2019 (1.0% in 2018). The annual average core inflation rate, which excludes unprocessed food and energy, was 0.5% (0.7% in 2018).

The decrease of the average rate of change of the CPI between 2018 and 2019 was influenced by the behaviour of core inflation and the negative evolution of the prices of energy (see Fig. 2). In 2019, the average rate of change of these aggregates was 0.5% and -1.8% respectively (0.7% and 4.7% in 2018). The prices of unprocessed food increased by 0.9%, above the rate observed of the previous year (0.6%).

Fig. 2 - Breakdown of the contributions for the CPI annual average rate of change

In December 2019, the annual inflation rate measured by the CPI was 0.4% (0.1 p.p. above the rate of the previous month). When rounded to one decimal place, this figure coincides with the value provided in the flash estimate, which was released on December 31st, 2019 (for further details on the differences between estimated and final CPI figures, see table 3 on page 5 of this press release).

The annual core inflation rate, which excludes energy and unprocessed food products components, was 0.4% (0.6% in the previous month). The energy products presented an annual rate of 0.0% (-3.2% in November), while the unprocessed food aggregate recorded an annual increase of 1.2% in December (1.0% in November).

The largest downward pressure on the overall annual rate of change came from decreases in the prices of *Clothing and footwear* and *Communications*, while the major upward pressure came from changes in the prices of *Transports, Restaurants and Hotels* and *Miscellaneous goods and services*.

In December, the CPI monthly rate was -0.1% (the same rate in November and -0.2% in December 2018). The main downward contribution to this result came from changes in the prices of *Clothing and footwear*. On the opposite side, increases were observed in the prices of *Transports*.

¹ Long series of the CPI since 1948 can be downloaded at <https://www.ine.pt/xportal/xmain?xpid=INE&xpgid=ipc>.
Consumer Price Index – December 2019

Harmonised Index of Consumer Prices (base 100 = 2015)

In December 2019, the HICP annual rate was 0.4% (0.2% in the previous month) while the HICP monthly rate was -0.3% (-0.7% in November and -0.4% in December 2018).

In November, the annual rate of change of the Portuguese HICP was 0.8 p.p. lower than the annual rate of change for the Euro area. That difference is estimated to have increased to 0.9 p.p. in December.

The HICP 12-month average rate was 0.3% in December (the same value as in November).

Housing Rents

In December, the annual change rate of the housing rents for the whole country was 3.4%, the same value as in the previous month. The highest increase was observed in the Lisboa region (4.2%), with all regions displaying positive rates of change.

For the same period, the monthly rate of change of the average value of rents per square meter for the whole country was 0.2% (0.3% in the previous month). The main increase was observed in the Algarve region (0.3%) and all the other regions presented positive rates.

In 2019, the 12-month average rate of change for of the average value of rents per square meter of living area for the whole country was 3.2% (1.9% in 2018)². The main increase was recorded in the Lisboa region (4.0%) and all the other regions presented positive rates.

² It is important to note that the housing rents component of the CPI takes into account the full *stock* of rented dwellings and cannot be compared to the results of the *House rental statistics at local level*, that are also published by INE, for which only the new lease agreements are considered.
Consumer Price Index – December 2019

Consumer Price Index

The Consumer Price Index (CPI) measures the change over time of the prices of a certain basket of goods and services bought by a “typical” consumer. The CPI has been designed to capture price changes and not to measure price levels.

The CPI is updated every year with the most recent information on prices and quantities. The 2018 CPI weighting structure and the sample of goods and services included in the basket are a result of the combination of three fundamental sources of information: results of the Portuguese National Accounts, complemented with the Household Budget Survey and the Census for more detailed levels of expenditure. Administrative data is also used.

The CPI is compiled through the aggregation of seven regional price indexes and the goods and services included in the index are grouped according to the Classification of individual consumption by purpose (COICOP).

Table 1: CPI - COICOP Divisions

01	Food and non-alcoholic beverages	07	Transports
02	Alcoholic beverages and tobacco	08	Communications
03	Clothing and footwear	09	Recreation and culture
04	Housing, water, electricity, gas and other fuels	10	Education
05	Furnishings, household equipment and routine maintenance of the house	11	Restaurants and hotels
06	Health	12	Miscellaneous goods and services

Monthly rate

The monthly rate is the change in the index of a certain month compared with the index of the previous month expressed as a percentage. Although up-to-date, this measure can be affected by seasonal and other effects.

Annual rate

The annual rate is the change in the index of a certain month compared with the index of the same month in the previous year expressed as a percentage. In the presence of a stable seasonal pattern, seasonal effects do not influence this measure.

12-month average rate

The 12-month average rate is the change in the average index of one year compared with the average index of the previous year expressed as a percentage. This moving average is less sensitive to transient changes in prices.

Core inflation index (all items CPI excluding unprocessed food and energy products)

The core inflation index is compiled by excluding the prices of unprocessed food and energy products from the all items CPI. The primary objective of this index is to capture the underlying inflation pressures in the economy.

Harmonised Index of Consumer Prices

The Harmonised Index of Consumer Prices (HICP) is compiled in each member state of the European Union for the purposes of inflation comparisons across EU countries, as required by the Treaty on European Union¹. This index plays an important role as a guideline for the achievement of the European System of Central Banks primary objective: price stability. In 1998, the European Central Bank adopted the HICP as “the most appropriate price measure” for its definition of price stability in the Euro area².

¹ Article 109j and protocol on the convergence criteria referred to in that article.

² A stability oriented monetary policy strategy for the ESCB”. ECB press notice released on 13 October 1998.

The HICP is produced in each Member State following a harmonized methodology developed by experts in the field of price statistics, under the "Price Statistics Working Group" and related Task Forces. From the methodological point of view, there are no major differences between the HICP and CPI. However, the different scope of coverage leads to differences in the weighting structure, mainly in Restaurants and hotels. This is mostly an effect of the inclusion of non-residents expenditure ("tourists") in the HICP and the corresponding exclusion from the CPI.

Additional information on the methodology of the HICP is available at <http://ec.europa.eu/eurostat/web/hicp>.

Table 2: CPI and HICP 2019 weighting structures

COICOP divisions		CPI	HICP
01	Food and non-alcoholic beverages	202.1	192.6
02	Alcoholic beverages and tobacco	38.0	37.0
03	Clothing and footwear	71.9	73.0
04	Housing, water, electricity, gas and other fuels	98.5	91.3
05	Furnishings, household equipment and routine household maintenance	61.0	58.9
06	Health	63.6	60.1
07	Transport	158.0	154.6
08	Communication	30.1	27.9
09	Recreation and culture	76.4	62.0
10	Education	15.2	14.0
11	Restaurants and hotels	85.1	135.1
12	Miscellaneous goods and services	100.2	93.5
00	All items	1 000¹	1 000

¹ Due to rounding, the sum of the parts may not add exactly to 1000.

Presentation of data and rounding rules

Since the release of the January 2013 CPI indices are published with base 100 in the year 2012.

Due to rounding procedures, those indices may not reproduce exactly the published rates of change. However, it should be noted that the published rates prevail.

In this press release the descriptive analysis is based on rounded values to one decimal.

Differences between estimated and final values

In table 3, some descriptive statistics are presented for the differences between the estimated and final values of the annual rate for the last 24 months. The table also includes the differences for the last three months, in p.p..

Table 3: Differences between the estimated and final values of the annual rate

	Differences last 24 months (p.p.)			Differences last 3 months (p.p.)		
	Mean	Max	Min	Oct-19	Nov-19	Dec-19
Total	-0.02	0.04	-0.09	-0.02	0.00	0.00
All items excluding housing	-0.02	0.03	-0.09	-0.03	0.00	0.00
All items excl. unproc. food and energy	-0.02	0.04	-0.15	-0.03	0.00	0.00
Unprocessed food	-0.02	0.05	-0.16	0.02	-0.01	0.02
Energy	0.01	0.26	-0.14	-0.02	-0.01	0.04

Next press releases

The January flash estimate will be available on January 31st.

The January CPI/HICP will be released on February 12th.
