EVOL.DA ACTIVIDADE NO COMERCIO
MED.MOVEL DE 3 MESES

EVOLUÇÃO DO COMÉRCIO POR GROSSO E A RETALHO

FEVEREIRO DE 1997

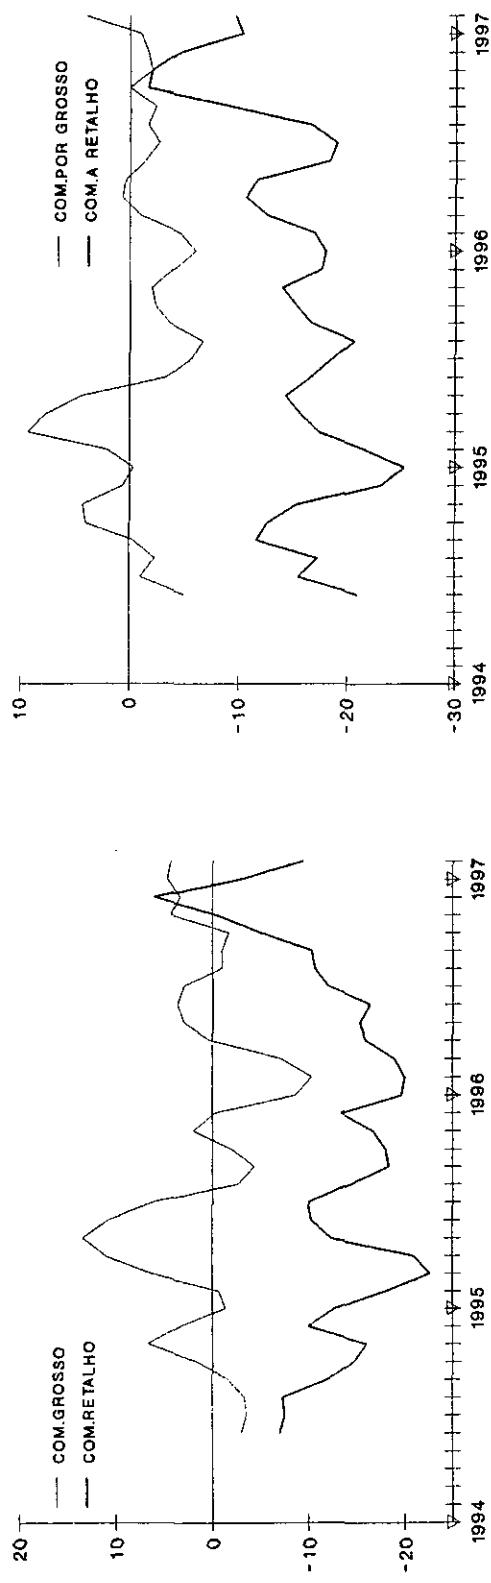

Em Fevereiro, manteve-se o perfil ascendente do indicador “apreciação da actividade passada”, já observado desde o segundo semestre de 1996(*). Esta tendência é devida, sobretudo, ao comércio a retalho.

Em ambos os subsectores, as opiniões dos empresários sobre a evolução do volume de vendas apresentaram-se mais favoráveis do que há um ano. Idêntico comportamento verifica-se nas perspectivas quanto à evolução da actividade para os próximos meses e nas encomendas a fornecedores.

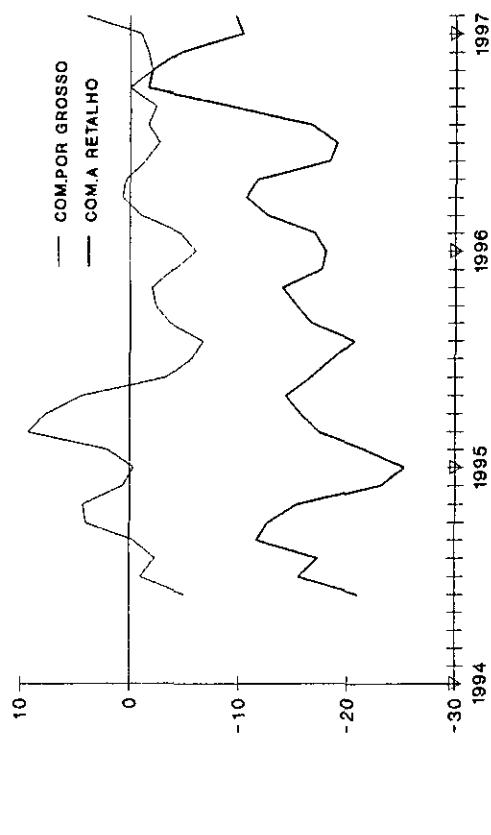

As expectativas quanto ao aumento dos preços de venda continuaram a apresentar-se a um nível superior ao do período homólogo, o que se deve fundamentalmente à evolução do comércio por grosso.

(*) A análise baseia-se principalmente nos gráficos e valores apresentados em anexo. Os gráficos resultam de médias móveis de três termos, fornecendo uma informação “atrasada”, embora “expurgada” de irregularidades.
