The Iberian Peninsula in Figures

2008

Differences and similarities in the European context

For the fifth consecutive year, Statistics Portugal and the National Statistics Institute of Spain present in the publication "The Iberian Peninsula in Figures 2008" the main indicators, allowing the characterization of both Iberian countries, and as part of a broader area, the European Union, to which both countries are members

"La Península Ibérica en Cifras 2008/ A Península Ibérica em Números 2008" – Differences and similarities in the European context

This publication presents some indicators around several themes: Territory and Environment; Population, Education and Culture; Health and Social Protection; Living Standards; Technology; Labour Market; National Accounts; International Trade; Industry, Construction and Energy; Agriculture and fishing; Services; Transports and Communication, and Tourism. It invites users to explore the vast amount of official statistical data available for free in Statistics Portugal, Statistics Spain and Eurostat. Websites.
