18 November 2022
VITAL STATISTICS – Monthly data
October 2022

DEATHS, LIVE BIRTHS AND MARRIAGES

THE NUMBER OF MARRIAGES CELEBRATED IN SEPTEMBER 2022 INCREASED BY 14.4% COMPARED TO THE SAME MONTH OF 2021

In October 2022, the number of deaths was 9,495, a figure higher than that registered in September 2022 (762 more deaths; +8.7%) and higher than the one observed in October 2021 (97 more deaths; +1.0%). From January to October 2022, there were 102,272 deaths, 1,036 fewer than in the same period of 2021 (-1.0%).

In October 2022, the number of deaths due to COVID-19 increased to 217 (39 more deaths than in September 2022), accounting for 2.3% of all deaths. Compared with October 2021, there was an increase of 33 deaths due to COVID-19.

In September 2022, 7,620 children were born alive, corresponding to an increase of 5.2% compared to September 2021 (7,246). The total number of live births registered in the first nine months of 2022 (61,678) was higher than the value observed in the same period of 2021 (59,464), representing a further 2,214 (+3.7 %) live births.

In September 2022, the natural balance was -1,103, a lower figure compared to the same month of 2021, when it reached the value of -1,305. In the first nine months of 2022, the accumulated value of the natural balance was -30,898, improving the one registered in the same period of 2021 (-34,357).

In September 2022, 5,128 marriages were celebrated, corresponding to an increase of 14.4% compared to the number of marriages held in September 2021 (645 more marriages). In the first nine months of 2022, 28,989 marriages were celebrated, 6,979 more (+31.7%) than in the same period of 2021.

In this press release, Statistics Portugal provides **preliminary data** on the number of deaths per month until October 2022, and per week until the 44th week of 2022 (October 31st to November 6th), and the number of live births and marriages per month until September 2022, that occurred in the national territory. The indicators published and analyzed in this Press Release are available on the Official Statistics Portal (<u>www.ine.pt</u>), with geographical breakdowns NUTS 2 and NUTS 3. The hyperlinks to these statistics can be found in the Excel file published together with this Press Release.

The information is obtained from the Sistema Integrado do Registo e Identificação Civil (SIRIC) until November 15th, 2022. The data presented regarding the number of deaths due to COVID-19, whose source is the report "Number of New Cases and Deaths Per Day" of the Directorate-General for Health, were extracted on November 15th, 2022.

VITAL STATISTICS - Monthly Data - October 2022

In October 2022, mortality increased by 1.0% when compared to the same month of 2021

In October 2022, the number of deaths rose to 9,495, 762 more deaths than in the previous month. Compared to the same month of 2021, the number of deaths increased slightly (97 more deaths; 1.0%). The number of deaths due to COVID-19 increased to 217 (39 more deaths compared to September 2022), accounting for 2.3% of all deaths. Compared to October 2021, there was an increase of 33 deaths (+17.9%) due to COVID-19.

Figure 1. Deaths and year-on-year change, January 2019 to October 2022

Source: Statistics Portugal, Deaths. Directorate-General of Health, <u>Number of New Cases and Deaths Per Day</u> (extracted on 15/11/2022).

Between January 31st and February 20th, 2022 (weeks 5 to 7), the number of deaths was higher than the average of the 5 years before the pandemic¹. Between February 21st and March 6th (weeks 8 and 9), the number of deaths returned to figures below the 2015-2019 average, as had already been registered in the last week of 2021 and the first four weeks of 2022. From March 7th to October 30th (weeks 10 to 43), the number of deaths was again above the average for the reference period (2015-2019).

In the 44th week of 2022 (October 31st to November 6th), there were 2,218 deaths, a value higher than the average for 2015-2019. The number of deaths due to COVID-19 was 46, accounting for 2.1% of all deaths.

VITAL STATISTICS - Monthly Data - October 2022

¹ In this press release, to measure the variation in the number of deaths in relation to the pre-pandemic period, a simple calculation measure was adopted, using the average number of deaths for the five-year period 2015-2019 as basis for comparison. This measure should not, therefore, be confused with other indicators published in some studies, specially by the EuroMOMO platform. For more information see https://www.euromomo.eu/.

Figure 3. Monthly deaths (cumulative values), 2019, 2020, 2021, and 2022

Source: Statistics Portugal, Deaths.

The "excess mortality" indicator calculated by Eurostat, compares the number of deaths recorded each month, in the European Union (EU-27) and EFTA countries, with the average number of monthly deaths in the period 2016-2019. In 2022, Portugal recorded excess mortality in all months, except for January. In September 2022, excess mortality in the EU-27 decreased to 9.3% (13.1% in August). Except for Slovakia, all countries registered excess mortality. Portugal increased to 11.4% (9.3% in August).

VITAL STATISTICS – Monthly Data – October 2022

TECHNICAL NOTE

Statistics Portugal releases the **preliminary** monthly **numbers** of deaths, live births, and marriages based on the information registered in the Civil Register Offices until November 15th, 2022. Indicators on the preliminary monthly number of live births, deaths, and marriages, from January to September 2022, with geographical breakdowns up to NUTS 3, as well as weekly number of deaths, until the 44th week 2022, by NUTS 3 and daily number of deaths, until November 6th, by NUTS 2 are made available on the Statistics Portugal Website.

Data are obtained from statistical operations of direct and exhaustive collection on live births, deaths and marriages in Portuguese territory using facts that are subject to compulsory civil registration (birth and death) in the Sistema Integrado do Registo e Identificação Civil (SIRIC).

In addition to administrative information obtained from Civil Register Offices, Statistics Portugal collects an additional set of variables identified as statistically pertinent to the National Statistic System (NSS) and the European Statistical System (EES). Data is recorded and sent electronically, in compliance with the requirements set out by Statistics Portugal and laid down in liaison with the Instituto de Registos e Notariado (IRN) and the Instituto de Gestão Financeira e Equipamentos da Justiça (IGFEJ).

Data on the number of deaths due to COVID-19 are also used, whose source is the "Number of New Cases and Deaths Per Day" Report of the Directorate-General for Health.

DEFINITIONS

Marriage: Contract signed by two persons that intend to start a family in full partnership and cohabitation according to legislation. Note: marriage can be held between persons from different or same sex.

Live birth: This is the complete expulsion or extraction from the mother's body, irrespective of the duration of the pregnancy, of a product of fertilization that, after separation, breathes or shows any other signs of life, such as a beating of the heart or umbilical cord or actual contraction of any muscle subject to voluntary movement, whether the umbilical cord has been severed and whether the placenta is retained.

Death: The permanent disappearance of vital functions.

Natural balance: The difference between the number of live births and the number of deaths during a given period, usually a calendar year.

Year-on-year change: The year-on-year change compares the level of a variable between the reference month and the same month of the previous year.

Excess mortality (source EUROSTAT, adapted): this indicator compares the number of deaths in each month, regardless of the cause of death, with that of a pre-pandemic reference period. In this case, the reference period consists of the average number of deaths that occurred in the month under analysis during the five-year period 2016-2019. When the indicator has a value greater than 100, it means that there were more deaths than in the reference period. In the case of a value lower than 100, this means that there were fewer deaths than in the reference period.
