## TECHNICAL SUPPORT

In April 1996 the International Monetary Fund (IMF) created the "Special Data Dissemination Standard" (SDDS) expecting to enhance transparency, integrity, timeliness and quality in statistical information. The SDDS releases information on macroeconomic data, public dissemination policy, and revision and methodology practices in statistical information.

Portugal adopted the SDDS in October 1998 and information on our country is provided by the "FMI Dissemination Standard Bulletin Board" accessible from Internet - <http://dsbb.imf.org>.

According to the SDDS advance dissemination calendar, also available on the IMF website, Statistics Portugal publishes on its website - [www.ine.pt](http://www.ine.pt) - relevant statistics, as soon as they are released: Quarterly National Accounts, Industrial Production Index, Labour Force Survey, Labour Cost Index, Consumer Price Index, Industrial Production Index Price, International Trade and Resident Population Estimates.

## Consumer prices up 2.7% in April 2007 on a year earlier

In April, the goods and services included in the Portuguese Consumer Price Index (CPI) cost on average 2.7% more than in April 2006, 0.4 percentage point (p.p.) higher than in the previous month (see figure 1).

The core inflation index, which excludes energy components and fresh unprocessed food products and intends to reflect price growth trends, rose at a lower rate than the CPI. Compared with April 2006, this index increased 2.4%, 0.3 p.p. lower than the CPI.

The CPI 12-month average rate was 2.8%. On a monthly basis, the CPI increased 0.9%, 0.4 p.p. higher than a year earlier.

The main upward contributions to the monthly rate of change were found in CPI divisions Alcoholic Beverages and Tobacco (5.7%) and Health (4.5%). Tobacco products, in particular, cost 8.2% more than in the previous month, reflecting the consumption tax raise which was administratively implemented at beginning of 2007 but that, due to the existence of large stocks at 2006 prices, only took effect in April prices. Moreover, hospital services rose 74.1%, reflecting, on the one hand, an update of the price of providing various health services in public hospitals and, on the other, the implementation of new fees in some of these services.

Other upward contributions to the CPI monthly rate came from changes in the prices of vegetable products (4.4%) and lubricants (2.9%).

Price decreases were found in CPI divisions Furnishings, household equipment and routine maintenance of the house (-0.1%) and Communication (-0.6%). Telephone and telefax services, gas and products related with gardening, cost on average, respectively, 0.7%, 1.1% and 5.2% less than in the previous month.

In April, the Harmonised Index of Consumer Prices (HICP) for Portugal rose 2.8% when compared with April 2006, 0.4 p.p. higher than the previous month. The HICP increased 0.9% between March and April 2007. The HICP 12-month average rate was 2.8%, 0.1 p.p. lower than in the previous month.

The gap between the Portuguese and the Euro-zone 12-month average rate of change is estimated to have remained unchanged at 0.8 p.p. between March and April 2007 (see figure 2).

The May 2007 CPI/HICP will be released on June 18<sup>th</sup> 2007

## Consumer Price Index

The Consumer Price Index (CPI) is an indicator showing how the prices of a certain basket of goods and services bought by a “typical” consumer change over time. The CPI has been designed to capture price changes and not to measure price levels. Both the consumption pattern and the goods and services included in the CPI basket were derived from the year 2000 Household Budget Survey and are updated annually with the most recent information on prices and quantities. The CPI is compiled through the aggregation of seven regional price indexes and the goods and services included in the index are grouped according to the COICOP classification.

**Table 1: CPI/COICOP Index Divisions**

|    |                                                                       |    |                                  |
|----|-----------------------------------------------------------------------|----|----------------------------------|
| 01 | Food and non-alcoholic beverages                                      | 07 | Transports                       |
| 02 | Alcoholic beverages and tobacco                                       | 08 | Communications                   |
| 03 | Clothing and footwear                                                 | 09 | Recreation and culture           |
| 04 | Housing, water, electricity, gas and other fuels                      | 10 | Education                        |
| 05 | Furnishings, household equipment and routine maintenance of the house | 11 | Restaurants and hotels           |
| 06 | Health                                                                | 12 | Miscellaneous goods and services |

### Monthly rate

The monthly rate is the change in the index of a certain month compared with the index of the previous month expressed as a percentage. Although up-to-date, this measure can be affected by seasonal and other effects.

### Annual rate

The annual rate is the change in the index of a certain month compared with the index of the same month in the previous year expressed as a percentage. In the presence of a stable seasonal pattern, seasonal effects do not influence this measure.

### 12-month average rate

The 12-month average rate is the change in the average index of one year compared with the average index of the previous year expressed as a percentage. This moving average is less sensitive to transient changes in prices.

### Core inflation index (all items CPI excluding unprocessed food and energy products)

The core inflation index is compiled by excluding unprocessed food and energy products from the all-items CPI. The primary objective of the exclusions is to eliminate some of the CPI components, which are most likely to be affected by temporary “external shocks” and to capture, in this way, the underlying inflation pressures in the economy. Examples of these “external shocks” include, among others, sharp changes in climatic conditions and the supply of raw materials such as oil. The *Serviço de Análise de Conjuntura e Previsão* of Departamento de Estatísticas Macroeconómicas of INE-Portugal releases a core inflation indicator based on a different methodological approach (factorial analysis) and, for this reason, it is possible that differences between the values shown by the two measures exist.

### Harmonised Index of Consumer Prices

The Harmonised Index of Consumer Prices (HICP) is compiled in each member state of the European Union for the purposes of inflation comparisons across EU countries, as required by the Treaty on European Union <sup>1</sup>. This index plays an important role as a guideline for the achievement of the European System of Central Banks primary objective: price stability. In 1998, the European Central Bank adopted the HICP as “the most appropriate price measure” for its definition of price stability in the Euro area <sup>2</sup>.
