The relevance and continued importance of the 2030 Agenda for Portugal justifies the continued dissemination of statistical information on the **Sustainable Development Goals (SDG)**, whenever appropriate. In this context, Statistics Portugal joins the celebration of National Sustainability Day by providing information on **SDG 7** (Affordable and Clean Energy), recognizing that energy lies at the heart of the major challenges and solutions related to global sustainability and is directly linked to the three dimensions of sustainable development: environmental, economic and social.

SUSTAINABLE DEVELOPMENT GOALS

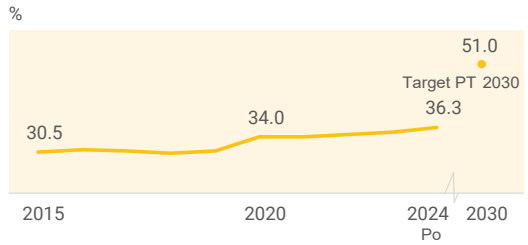
**7 AFFORDABLE AND CLEAN ENERGY**

The SDG 7 aims to ensure universal access to reliable, sustainable and modern energy. Achieving this goal requires increasing the use of renewable energy sources, improving energy efficiency, and promoting cleaner and more innovative infrastructure and technologies, thereby contributing to a sustainable energy transition and to climate change mitigation.

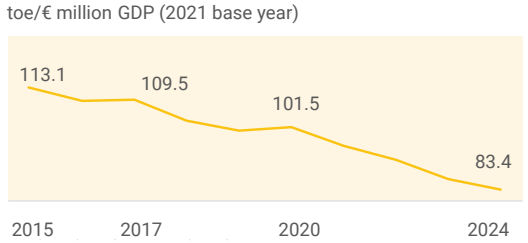
The targets associated with SDG 7 focus on ensuring universal access to modern and affordable energy services, increasing the share of renewable energy in final energy consumption, advancing energy efficiency, and strengthening investment in clean energy infrastructure and technologies. These targets also recognize international cooperation as an important instrument for the development and dissemination of sustainable energy solutions.

| | 2015 | 2024 |
|---|---|---|
| **7.1.1 Proportion of population with access to electricity** | **100%** | **100%** |
| **7.1.2 Proportion of population with primary reliance on clean fuels and technology** | **97.0%** | **99.0%** |
| **7.2.1 Renewable energy share in the total final energy consumption** | **30.5%** | **36.3%** |
| **7.3.1 Energy intensity measured in terms of primary energy and GDP** | **113.1** toe/€ million | **83.4** toe/€ million |
| **7.a.1 International financial flows to developing countries in support of clean energy research and development and renewable energy production, including in hybrid systems** | **2.93** € million | **0.14** (2025) € million |
| **7.b.1 Installed renewable energy-generating capacity in developing and developed countries** | **1,183** W per capita | **1,943** W per capita |

## 7.2.1 - Renewable energy share in total final energy consumption



## 7.3.1 - Energy intensity of the economy in primary energy



## 7.b.1 - Installed renewable energy-generating capacity
