The Iberian Peninsula in Figures 2009 edition

Spain and Portugal: Similarities and differences in the European context

National Statistics Institute of Spain and Statistics Portugal present the 6th edition of the “The Iberian Peninsula in Figures”.

This publication presents a suggestive range of official statistical indicators which allows to set comparisons between the two Iberian countries, as well as to observe the position each country occupies in the context of the European Union.

“La Península Ibérica en Cifras / The Iberian Peninsula in figures” – Differences and similarities in the European context.

The information is grouped in several statistical themes and, in some cases, has regional detail. Once again, it aims at inviting users for searching and updating a wide range of official statistical information which is freely available on the websites of Statistics Spain, Statistics Portugal and Eurostat.
