PUBLIC STATISTICS FOR PROGRAMMING AND MONITORING COHESION POLICY – POLISH EXPERIENCE WITH THE STRATEG SYSTEM

Dominika Rogalińska Central Statistical Office of Poland (GUS)

SCORUS, Lisbon, 29th June – 1st July 2016

GENESIS OF THE STRATEG PROJECT

GOALS OF THE STRATEG PROJECT

MILESTONES OF THE STRATEG PROJECT

BACKGROUND OF THE STRATEG PROJECT

SCOPE OF INFORMATION IN STRATEG

FUNCTIONING OF STRATEG SYSTEM

VALUE ADDED OF THE STRATEG PROJECT

The role of public statistics in the information system of the country:

- information support for policy making and monitoring processes
- competitive advantages:
 - Methodology of surveys
 - Quality of statistics
 - Permanence of information

Agreement between Ministry of Regional Development (coordinator of the national system of strategies) and Central Statistical Office – December 2012

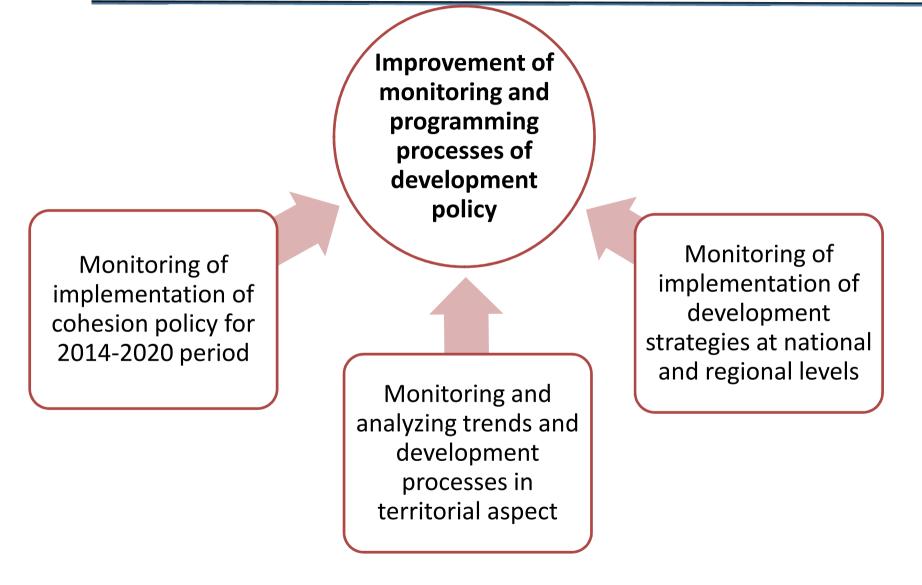

Target: elaboration of the system of the key indicators for monitoring and programming the development policy

The project "Management of development - improving the quality of governance in Poland", financed from European Funds (Operational Programme "Human Capital")

strateg

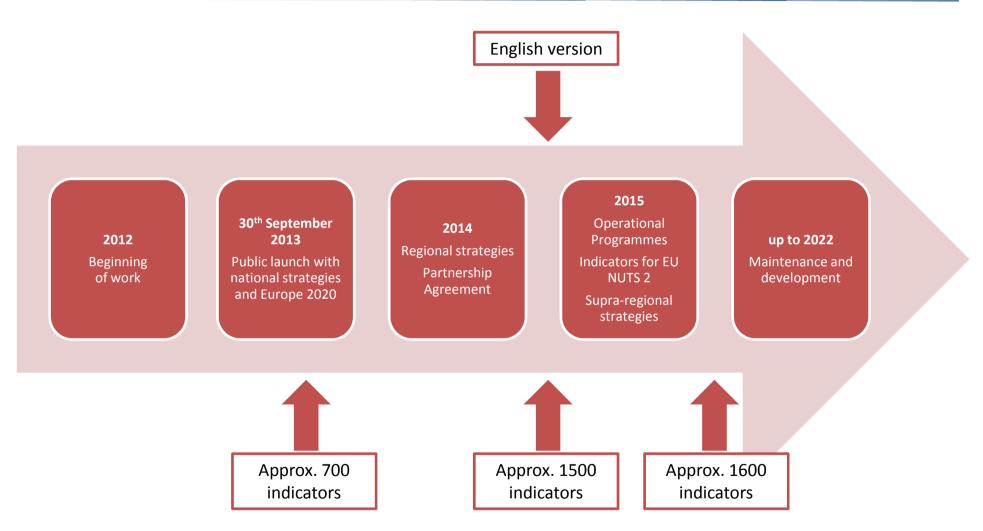

MILESTONES OF THE STRATEG PROJECT

Basis for development and cohesion policy on EU level:

• Europe 2020: a long-term strategy of socio-economic development of the European Union for years 2010-2020, based on 5 EU headline targets which are currently being measured by 11 headline indicators.

Basis for cohesion policy on national and regional level:

• **Partnership Agreement**, 6 national Operational Programmes and 16 regional Operational Programmes for 2014-2020 period

Basis for development policy on national and regional levels:

- Europe 2020 targets translated into national targets (National Reform Programs)
- other national programs for Poland complex system of strategies:
 - Long-term strategy National Development Strategy 2030
 - Medium-term strategy National Development Strategy 2020
 - 9 integrated strategies on:
 - transport
 - human capital
 - social capital
 - energy security and environment
 - regional development, etc.
 - The National Spatial Development Concept
 - 16 regional strategies
 - 4 supra-regional strategies

All programs monitored by dedicated sets of indicators

Public database for the needs of policy planning and monitoring process

Rich set of information – data, metadata (definitions, methodological explanations), information on strategies and programmes, elaborations, subject analyses and publications

Modern tools used to visualize analyses of phenomena

Possibility of arithmetical operations on data

Flexible and permanent system (it will have been being maintained and developed at least until 2022)

Target users - representatives of government and self-government, engaged in the development policy programming and monitoring process, policy makers, and others

SCOPE OF INFORMATION IN STRATEG

More than 1600 main indicators (with breakdown by sex, age, rural and urban areas, were possible – more than 2100 indicators)

Data for Poland and detailed territorial levels (up to LAU 2, where available)

Time series since 2003

Data for EU countries

Selected indicators for EU regions (NUTS 2)

DATABASE

Welcome to STRATEG

STRATEG is a system created by the Central Statistical Office for programming and monitoring of development policy. It is a collection of data derived from different sources and used to monitor the implementation of strategies binding in Poland (at the national, supra-national and voivodship levels) as well as in the European Union (Europe 2020 strategy). Additionally, the system gathers statistical indicators relevant to the implementation of cohesion policy. Apart from numerical data, STRATEG also includes definitions of concepts, methodological explanations, reports and thematic analyses. Along with a highly developed database application, the STRATEG system offers its users functional tools supporting the analysis of socio-economic trends in form of charts and maps. **The Statistical Guide** will support you in interpretation of data.

FUNCTIONING OF STRATEG SYSTEM – METADATA

| Indicator profile | | Indicator description | | | | |
|---|---|-----------------------------------|---|--|--|--|
| Save Print | | | Indicator is the main measure in research and development statistics, characterized the competitiveness and the level of knowledge economy. | | | |
| Indicator name | Expenditures on R&D in relation to GDP | | Research and experimental development (R&D) comprise creative work undertaken on a systematic basis in order to increase the stock of knowledge (e.g. about man, culture and society) and the use of this stock of knowledge to devise new applications. | | | |
| Alternative name / indicator used in the strategy/programme | - | | Research and development activity includes: scientific research (basic research - experimental or theoretical work undertaken primarily to achieve specific practical applications, applied research - original investigation undertaken in order to acquire new knowledge that has specific practical applications, industrial research - undertaken in order to acquire new knowledge directed to producing | | | |
| | Europe 2020 Strategy Long-term National Development Strategy National Development Strategy National Strategic Reference Framework National Strategy of Regional Development | | new or significantly improved goods, processes or services and experimental development (systematic work, drawing on existing knowledge, which is directed to producing new or significantly improved goods, processes or services). R&D is distinguished from other types of activity from visible element of novelty and the elimination of scientific and technical uncertainty. R&D surveys are carried out on the basis of international methodology (Frascati Manual). | | | |
| | Partnership Agreement Strategy for Development of the Dolnoślaskie Voivodship Strategy for Development of the Lubuskie Voivodship Strategy for Development of the Lubuskie Voivodship Strategy for Development of the Łódzkie Voivodship Strategy for Development of the Malopolskie Voivodship Strategy for Development of the Poplskie Voivodship Strategy for Development of the Poplaskie Voivodship Strategy for Development of the Pomorskie Voivodship Strategy for Development of the Salskie Voivodship Strategy for Development of the Salskie Voivodship Strategy for Development of the Salskie Voivodship Strategy for Development of the Świetokrzyskie Voivodship Strategy for Development of the Wielkopolskie Voivodship | Methodological explanations | Intramural expenditures on R&D are expenditures incurred in a reporting year on R&D in the report entity, irrespective of origin of such funds, i.e. including funds obtained from abroad (exports of R&C They cover both current expenditures and investment outlays on fixed assets related to R&D, but d not cover depreciation of these assets. | | | |
| Strategic/programme | | | Current expenditures on R&D are personnel outlays; costs of consumption of materials, nondurable objects and energy; costs of services made by other contractions (other than R&D) including; third party processing, transport, repair, bank, postal, telecommunication, information technology, publishing, municipal, etc. services; costs of business trips and other current costs, including in particular taxes and fees charged on costs of operating activity and profits, property insurance and equivalent for the benefit of employees: in part in which they are related to R&D. Total current expenditures do not include depreciation of fixed assets and VAT tax. | | | |
| documents / targets for monitoring | Strategy for Development of Western Poland Strategy for Innovation and Efficiency of the Economy Strategy for Socio-Economic Development of the Warmińsko-Mazurskie Voivodship Regional Operational Programme of Dolnoślaskie Voivodship | | Capital expenditures on R&D cover new tixed assets connected with R&D purchase (taking over) of second-hand fixed assets as well as outlays on initial investments (not included in fixed assets and purchased from investment funds). | | | |
| | Regional Operational Programme of Kuiawsko-Pomorskie Voivodship Regional Operational Programme of Lubelskie Voivodship Regional Operational Programme of Lubelskie Voivodship Regional Operational Programme of Kolpskie Voivodship Regional Operational Programme of Macouscikie Voivodship Regional Operational Programme of Macouscikie Voivodship Regional Operational Programme of Macouscikie Voivodship Regional Operational Programme of Poolskie Voivodship Regional Operational Programme of Siaskie Voivodship Regional Operational Programme of Varmiško-Mazurskie Voivodship | | Gross domestic product (GDP) illustrates the final result of the activity of all entities of the national economy. | | | |
| | | Data source | Central Statistical Office | | | |
| | | Data availability in the system | Annual data; since 2003 | | | |
| | | Available variables | Not applicable | | | |
| | | Territorial level of availability | Poland, Central Poland, Eastern Poland, Southern Poland, Western Poland, NTS 2 | | | |
| | Regional Operational Programme of Wielkopolskie Voivodship Regional Operational Programme of Zachodniopomorskie Voivodship | Availability for EU | EU-28, EU-27, EU countries Source of data: Eurostat | | | |
| Themes | Research and innovation | | | | | |
| The goal of cohesion policy | Smart growth: - Strengthening research, technological development and innovation | Remarks | Data for Poland in total for years 2003-2013 and for voivodships and functional areas for years 2010- 2012 previously presented in Strateg system has been changed with regard for the adoption of ESA 2010 methodology. See more: http://stat.gov.pl/en/topics/national-accounts/european-system-of- national-and-regional-accounts-esa-2010/ | | | |
| | Sum of intramural expenditures on research and development activity incurred by all national entities conducting this activity, irrespective of origin of the funds, in relation to GDP. | | To access the data according to ESA 1995 please follow the path described below: 1. click the link: http://stat.gov.pl/en/poland-macroeconomic-indicators/ 2. choose the position called Annual macroeconomic indicators | | | |

3. in the List of tables click the position National accounts - ESA 1995.
