TIME TO DELIVER:

a fair, green and digital recovery

- Time to deliver, with the sense of urgency needed given the crisis and the challenges Europe is facing.
- Time to deliver, with the knowledge that the European social model is the best tool for overcoming the challenges of the economic and social recovery and the twin digital and climate transitions.
- Time to deliver a Europe that is resilient, sustainable, innovative, cohesive and open to the world, with the future in mind.
- Time to deliver, together, for the coming generations.
